

REACH Compliance Declaration:

Smart Systems Ltd is dedicated to providing high quality fenestration solutions that meet environmental regulations, including REACH (Registration, Authorization and Restriction of Chemicals, European Union Regulation (EC) 1907/2006). The following information is provided to assist you in meeting your environmental policies and procedures.

Unless stated specifically in an attached Materials Data Sheet (MDS), products that Smart Systems Ltd supplies to you contain hazardous materials that are below the threshold in REACH legislations. Where hazardous material concentrations are above REACH thresholds, they are noted in the MDS. At the time of writing this letter, no products manufactured by Smart Systems Ltd were above the REACH threshold. No MDS will be supplied, unless expressly requested, where the hazardous material contents are below REACH thresholds.

The environmental regulations change constantly. We will try our best to keep you abreast of changes that affect Smart Systems Ltd products by periodically updating this letter.

REACH Compliance:

In June 2007, the European Union Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) entered into force. This Regulation establishes specific duties and obligations on companies in the European Union (EU) that manufacture or import substances on their own, in preparations, or in articles.

- Under the structure of the REACH Regulation, Smart Systems Ltd is a manufacturer and supplier of “articles” to our EU customers
- Smart Systems Ltd is constantly monitoring the substances of very high concern (SVHC), as defined by REACH, in our products. This will be an on-going process since the complete list of SVHCs will be released in stages
- The customers are encouraged to visit the following site to get the most up to date information on current list of SVHCs under REACH:
http://echa.europa.eu/chem_data/authorisation_process/candidate_list_table_en.asp
- Smart Systems Ltd products (articles) do not contain substances of very high concern (SVHC) above the threshold value declared as per ECHA (on October 2008 and revised until 19th December 2012).

Should you require any further information with regards the above, please contact:
